

## SCHEME OF DRAWAL OF WATER

It is proposed to draw 3.73 cusec, i.e. 380 cubic meter per hour from river bheden at location latitude 21 48 39 and longitude 83 57 22 by lying water pipeline for approx.. 5.5 km. Water will be drawn through 3 hp turbine pump with installation of air valves, pressure valves and other such auxiliaries as per the site condition. The quantity of water drawn will be adequately recorded through water flow meter at initial drawal point from the source. The detail of the scheme alongwith design of pipeline and motor & Pump size, panel board etc will be submitted at the time of approval of the scheme of drawal to the competent authority.
